

# Secure your Printer with WAVE ID<sup>®</sup> readers + Kofax's Software Platform

## A complete hardware + software solution with no third-party licensing fees

Every printer is an essential information hub. Make sure these critical assets are secure throughout your organization. With license-free software integrations for WAVE ID readers, it's now easier than ever to streamline authentication across the complete Kofax software platform using your existing credentials.

You can elevate your printer offerings in the marketplace with an integrated authentication solution that virtually

eliminates the risk of unauthorized users, abandoned documents and compromised networks—while enabling an audit trail of all activities.

And you can eliminate passwords, simplify workflows and keep users contented and productive by enabling instant, touchless printer access. WAVE ID readers combine with Kofax software to provide authentication and a formidable defense.

## WAVE ID<sup>®</sup> credential readers from rf IDEAS

rf IDEAS has been the trusted leader for secure print authentication for more than 25 years. The WAVE ID family of readers sets the standard for quality, reliability and versatility. With a complete range of form factors and functions, you can easily integrate the optimum reader to suit any printer design and any user need. The most popular WAVE ID readers for secure print include:

- **WAVE ID<sup>®</sup> Plus Mini.**  
The smallest, most capable desktop reader in the rf IDEAS lineup offers all the same features and functionality as WAVE ID SP Plus in a 35% smaller, 37% lighter form factor for even more versatile placement.
- **WAVE ID<sup>®</sup> SP and WAVE ID<sup>®</sup> SP Plus.** These single- and dual-frequency readers maximize the value of existing card systems—from proximity to contactless smart card—with the ability to update the SIM technology to read future cards. The small, thin design can be surface-mounted or OEM-embedded into recessed compartments.
- **WAVE ID<sup>®</sup> Plus Mini.**  
The smallest, most capable desktop reader in the rf IDEAS lineup offers all the same features and functionality as WAVE ID SP Plus in a 35% smaller, 37% lighter form factor for even more versatile placement.
- **WAVE ID<sup>®</sup> Nano.**  
The WAVE ID Nano is the world's smallest badge reader, available in USB-A or USB-C. Its compact size makes it ideal for on-the-go or remote workers.

## Experience the benefits of Kofax's Software Platform

Kofax's Intelligent Automation Platform helps organizations transform information-intensive business processes, reduce manual work and errors, minimize costs and improve customer engagement.

- **No third-party licensing fees.** Provide customers with an affordable solution to improve business security and efficiency, now and for years to come.
- **Centralized print management.** Give customers a big-picture view of print activities across the organization, gaining the insight you need to create a fraud-proof framework.
- **Secure print authentication.** Secure print jobs remain on the server until the owner is physically at the printer. A wave or tap of the user's credential release the job for printing.
- **Restricted printing based on device or content.** Content-aware software can ensure that sensitive documents are only released to users with the appropriate credentials or withheld from printers in highly public locations.
- **Audit trail for print jobs.** With detailed logging of every print action and its associated user, businesses can quickly identify problematic events and respond accordingly.
- **Reduced waste.** End wasted paper, toner and excess maintenance costs due to print jobs that are never picked up.

## A complete secure print architecture

Give your customers peace of mind that they can keep healthcare, insurance, legal, HR and other private documents in trusted hands only, maintaining regulatory compliance. Fight fraud and cybercrime by ensuring that only authorized users can access network-connected printers and sensitive print jobs.

Together, WAVE ID readers and Kofax software create a complete secure print architecture for multi-function printers and the networks they're connected to. Elevating you to the position of indispensable print solution partner
