

Secure Endpoints. Save Time. Simplify Security.

Enable highly secure and compliant logical access beyond the door

Passwords today are taking up too much time, money, and resources for enterprises globally, while opening the door for greater risk. Because passwords are typically reused, fairly easy to 'hack', and sometimes shared between employees, they are also today's number one cause of more than 80% of hacking-related breaches⁴.

Why not remove the risk of passwords altogether with highly secure tap-and-go authentication?

83% of all organizations experienced at least one data breach in 2022¹

\$4.45M = the average cost of a data breach in the US in 2023¹

The total number of ransomware attacks surged by **13%** in 2022²

Each password reset costs an organization **\$70³**

Why Today's Top Organizations Use WAVE ID[®]

Greater Data Security

Since passwords leave business data vulnerable to attack, using existing credentials for passwordless authentication is an ideal way to keep up with evolving data security protocols without disrupting productivity.

Use your

- ID Badge
- Passkeys
- Smart Card
- Security Key
- Smartphone
- Biometrics

Improved Workforce Productivity + Seamless Integration

Constantly re-entering and resetting passwords for multiple business applications and workstations wastes valuable time each day that could be better spent on customers. WAVE ID can equip nearly all of your major business systems to be passwordless.

Strengthened Regulatory Compliance

As regulations such as GDPR and Multi-factor Authentication protocols shift and change over time, businesses today find themselves struggling to maintain compliance. rfIDEAS can help Fortune 500 corporations with compliance by migrating from less secure passwords to more secure credentials.

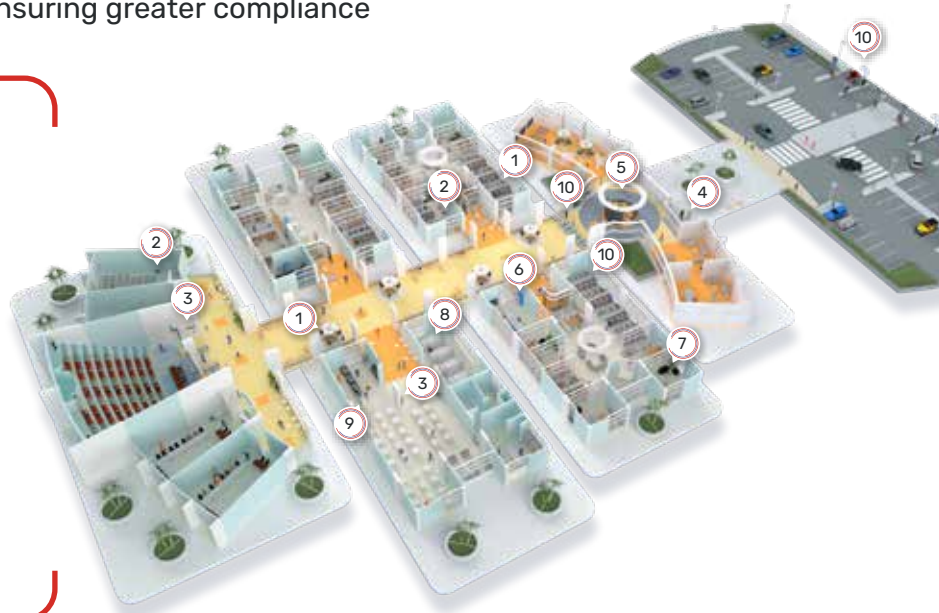

Deploy Secure Authentication Across the Enterprise
