

# Imagine a Day Without Passwords

What would just one passwordless day do for employee productivity and business security?

Cary, a physician's assistant, enters **70+ passwords every workday**

**1 SHIFT = 70+ PASSWORDS**

## Building access

ID badges have always been required for building access, but they could also be the key to far greater productivity and security.

## Patient care

Focus on each patient's needs with a tap-and-go solution that eliminates the time and distraction of repeatedly typing passwords.

## Printed records

Eliminate PINs and passwords at the printer while improving protected health information security and enhancing audit trails in compliance with HIPAA.

## Medications/EPCS

Improve patient safety and prevent drug theft by eliminating the risk of forgotten, mistyped or stolen passwords.

## Access on the go

Streamline access to multiple workstations and devices without the delay of typing network logins again after each session timeout.

**Password reset.** Eliminate repeated resets that interrupt caregiver workflows and divert IT from more productive tasks.

Passwordless single sign-on can save each care provider **45 minutes per shift.**<sup>1</sup>

<sup>1</sup> Imprivata

Healthcare breaches cost providers an average of **\$614 per record.**<sup>2</sup>

<sup>2</sup> ForgeRock

Passwordless SSO could potentially prevent **millions of dollars** in regulatory fines and lost reputation.

**How many employees do you have, entering passwords over and over each day?** How much will you save in time, money and goodwill with passwordless WAVE ID® badge readers? Let's talk and run the numbers.

**Don't type. Just tap.**
