

# Solutions for Identification and Access

## Powering the badge

In industry, nearly all employees wear ID badges. Traditionally an ID badge is used for visual identity and/or building access. While many companies and institutions need to perform door access, they do not realize they can leverage their ID badge investment to solve log-on, employee identification, or time/attendance functions. A single badge solution is a cost effective approach that should be leveraged.

"With RF IDEas' readers our healthcare customers are able to leverage their existing building access badges to provide secure two factor authentication, easily switch users in shared workstation environments and comply with HIPAA requirements. RF IDEas' customer service is second to none and they are able to rapidly respond to our needs."

-M.M. Encentuate.

## pcProx® 82 Series

Get started using your existing employee badge system for enhanced security and functionality with the 82 Series pcProx reader from RF IDEas. We help to facilitate the deployment of services like single-sign-on (SSO) solutions by offering compatibility between the over 500 million different cards, tags and labels used for facility access.

## pcProx® Enroll

The pcProx series is compatible with over 300 million physical access proximity cards giving the flexibility to use building access cards for other forms of identification and security throughout the workplace. pcProx is a true plug-n-play reader for 125 kHz proximity cards and is configurable and easy to deploy. All card formats are supported.

## AIR ID® Enroll

This reader series is designed to read the facility code/ID number or card serial number of nearly all 13.56 MHz contactless smart cards. The AIR ID Enroll has the same functionality as the pcProx product and is just as easy to deploy.

## pcSwipe® Enroll

The RF IDEas pcSwipe intelligent magnetic stripe card reader is a cost-effective and efficient solution for customers wanting to leverage their existing base of magnetic stripe card-carrying personnel. In addition to solid construction and numerous flush mounting options, key features include bi-directional swiping capability and fast swipe speeds for maximum usability.

## pcProx® Sonar

The pcProx Sonar solves security risks and privacy concerns with unattended computers without requiring additional software or user action. This solution is a presence detector, not a badge reader. When a user steps away from the computer, the product automatically locks the computer.
