systems partners. HardBanks are easily configured to support larger camera counts of up to 48TB of shared SAN storage with embedded VMS failover protection. The unique approach of combining virtual servers with high-availability shared storage eliminates the need for separate physical servers, reducing acquisition and operating costs by up to 40 percent.

### Platinum Tools' VDV MapMaster voice, data, and video tester

For more information, visit [www.platinumtools.com](http://www.platinumtools.com) or call 800-749-5783  
**ISC West Booth No. 4044**

The compact Platinum Tools VDV MapMaster voice, data, and video tester combines continuity testing, mapping, and tone generator functions into a single unit. Made in the USA, the VDV MapMaster is capable of identifying and mapping 19 locations at one time. The VDV MapMaster tests Cat-6, Cat5e, Cat-5, Cat-4, Cat-3, and coax cables, as well as shielded cables. Video and data cables can be connected to their respective remotes at the same time. MSRP: \$99.97

### Quantum Group's 9RF

For more information, visit [www.QGinc.com](http://www.QGinc.com) or call 800-432-5599  
**ISC West Booth No. 11147**

Quantum Group Inc., San Diego, CA, announces its COSTAR Model 9RF wireless

carbon monoxide alarm. The new wireless alarm can be adapted to most any central panel by changing the transmitter. The first application of the 9RF is the Leak Protection Technologies

panels. The COSTAR 9RF is capable of being used in unconditioned space such as garages, attics and basements. Quantum Group believes most other wireless alarms require a conditioned space.

### Research Electronics International's OSCOR Blue Spectrum Analyzer

For more information, visit [www.reiusa.net](http://www.reiusa.net) or call 800-824-3190  
**ISC West Booth No. 19129**

OSCOR Blue is a hand-held spectrum analyzer able to detect sophisticated RF signals in the toughest environments. OSCOR Blue sweeps 24GHz in under a second with the help of its completely integrated built-in antenna system and trace analysis software. The operator can zoom on signals, generate signal lists and save them for future analysis. REI's Center for Technical Security provides TSCM training to owners maximize the capabilities of the OSCOR Blue Spectrum Analyzer.

### RF Ideas' pcProx ExpressCard

For more information, visit [www.RFIDEas.com](http://www.RFIDEas.com) or call 866-439-4884  
**ISC West Booth No. 6043**

The pcProx ExpressCard adds flexibility to connectivity needs by including the technology of RF Ideas' standard readers into an ExpressCard format. It is designed to provide interchangeability among computers and other devices where ruggedness, low power and small size are critical. The ExpressCard can be easily and quickly installed in any device that has an ExpressCard slot. This reader offers straightforward installation, configuration and the same ease-of use and flexibility expected with RF IDEas' products.

through encryption and mutual authentication. SARGENT Profile Series locks connect to your existing network using non-proprietary and industry standard equipment, reducing cost and easing installation. They feature ANSI/BHMA Grade 1 hardware and are available in exit device, mortise and cylindrical lock configurations.

### SDI's Smoke Sabre

For more information, visit [www.sdifire.com](http://www.sdifire.com) or call 732-751-9266  
**ISC West Booth No. 7040**

Introducing a totally new concept in smoke detector testing. Smoke sabre is the solution to problems previously associated with aerosol smoke detector testers.

### Speco Technologies' 4 Channel IP Camera NVR Server

For more information, visit [www.specotech.com](http://www.specotech.com) or call 800-645-5516  
**ISC West Booth No. 18041**

Speco Technologies newest addition to the IP product line is the NVRP4 NVR. It features an embedded Linux system that has the same feel as a PC format DVR and works with Speco's PC Series CMPC. It supports H.264, MJPEG and MPEG4 compression for recording and includes dual gigabit NICs for larger data streams. Each channel can support up to 2.5MP cameras while the last channel will support up to a 5MP camera. The system supports 50 IP camera brands.

### Safety Technology International's Wireless Mail Box Alert

For more information, visit [www.sti-usa.com](http://www.sti-usa.com) or call 800-888-4784  
**ISC West Booth No. 24041**

Don't trudge out in the miserable weather to check for your mail. The STI Wireless Mail Alert beeps

and flashes when your mail is delivered. The mailbox sensor is triggered when a postal carrier opens the mailbox door. The sensor transmits a signal to the indoor receiver (up to 1000 feet away) alerting you that the mail has arrived. Sensor uses one battery (included) and receiver uses an adapter (included).
