

**ASSET TRACKING / RFID**

**Primera Technology Inc.**

**RX900**

The RX900 is a full-color, on-demand label and tag printer that also has built-in RFID encoding technology supplied by Intermec. It is compliant with EPC Global Gen 2 Class 1 and ISO 18000 -b and -c specifications. The printer is designed for applications that need both color and RFID, including file folder tracking, retail and apparel tags, data tape tracking, pharmaceutical labels, oversized ID badges and wristbands. Printer drivers are included for Windows XP/Vista/7 along with NiceLabel SE and Seagull Scientific's BarTender software. *Primera Technology Inc.*

**RF IDEas Inc.**

**pcProx Plus**

The pcProx Plus is a dual frequency reader that combines 125 kHz and 13.56 MHz technologies into the same device. The programmable reader features USB connectivity, reads more than 35 different card types and is suitable for enrollment into third party software, multi-function printers or single sign-on integrators. When used as a logon reader, it is HIPAA-compliant, meeting the strict regulations of the health care industry. *RF IDEas Inc.*

**MOBOTIX**

**T24**

The T24 IP Video Door Station features a fisheye lens that captures the entire entrance area of a home or office without any blind spots. Based on the international VoIP/SIP telephony standard, the device connects directly with an IP video phone, standard PC or tablet computer, allowing two-way video connection from anywhere in the world. RFID-driven keyless access and integrated voice messaging round out the product's features. The device is based on the company's decentralized IP network video surveillance concept. *MOBOTIX*

**Data Locker Inc.**

**DL3**

The DL3 portable hard drive features 256-bit AES XTS mode full-drive encryption and a patented touch screen authentication panel. The encryption and data management is performed at the device level and is completely platform and operating system independent, eliminating the need for any software and drivers. Additional features include SuperSpeed USB 3.0 interface, two-factor authentication with optional RFID mode, up to 1 TB storage capacity and rapid key zeroization for secure redeployment. *Data Locker Inc.*
