

Mobile Applications for Enterprise

Bring “Less Touch, More Trust” to a range of environments

Today, rf IDEAS® extends our industry-leading WAVE ID® authentication technologies into the industry’s most flexible and accessible range of mobile credential solutions.

These on-the-go, contactless solutions provide seamless authentication via smartphone credentials while offering compatibility with existing cards.

Mobile Applications for Enterprise

Here are just a few of the ways that mobility delivers a clear advantage in safety, security and productivity

Identity Access Management

Use WAVE ID® Mobile readers with integrated **Bluetooth®** technology to eliminate usernames and passwords. Access records, files and equipment with a quick wave versus time-consuming logins.

Contact Tracing

Organizations of all sizes can use mobile readers as a critical element in their proactive contact tracing efforts. Positive cases can be traced from lobby to office, cafeteria to conference room, streamlining efforts to mitigate spread.

Time & Attendance

Automatically and accurately capture employee or vendor credentials to analyze arrivals, departures, or breaks. Know who's participating in special events or logging into hourly timesheets.

Smart Wallet

Give employees a fast and convenient way to login and pay for cafeteria or vending machine items, parking garage use, health club memberships or other office perks.

Training

Securely and effortlessly track employee attendance at required training sessions, seminars or mandatory events.

Secure Print

Use smartphone credentials to provide simple, powerful protection against unauthorized access to confidential documents and other important data found on network-connected multifunction printers.

Mobile Applications for Enterprise

A wide range of high-performance readers

WAVE ID® Mobile Readers

To support mobility in all ecorporate environments, rf IDEAS® offers dual-frequency readers that incorporate a **Bluetooth®** reader for reading existing 125 kHz proximity or 13.56 MHz contactless smart cards.

Our growing list of mobile credential readers include:

WAVE ID® Mobile Reader
for Orange Business Services Pack ID

WAVE ID® Mobile Reader for Safetrust Wallet

WAVE ID® Mobile Reader for HID Mobile Access®
