# Who is Gatekeeper?

Your Affordable,  
Intelligent,  
Multimodal  
AI Guard

Face Recognition

NFC Scan (Physical& Mobile)

## What it can do for you?

- Contactless Temperature Screener
- Mask Detection
- Face Recognition
- NFC Scan (Physical& Mobile)
- Real-time Unusual Alerts

Contactless Temp Screener

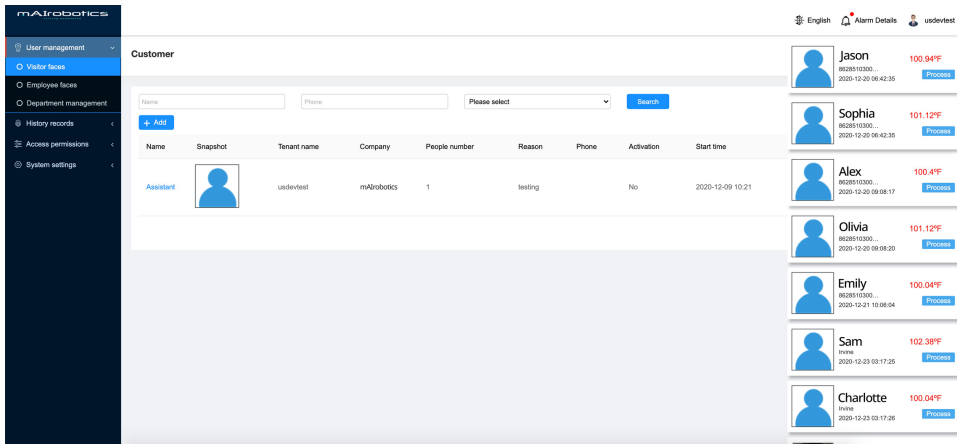

Real-time Alerts

# What else?

- Dialogue (Talk& ask Gatekeeper for help like a real front desk)
- Survey Integrated
- Monitor Access

## Visitor Management

## QR Code Scanner& Sticker Printer

- QR code Scanner
- Access Sticker Printer
- Visitor Management
- Employee Management

## Survey Integrated

## Dialogue (Search Starbucks on Google Map)

# Why Gatekeeper?

Gatekeeper is  
NOT ONLY  
a contactless temp screener,

BUT ALSO  
an Multimodal  
integrated  
AI Guard

- Contactless, fast and highly accurate SINGLE-POINT temperature detection at a speed of 0.5 sec per scan.
- AI deep learning algorithm based on neural network provides higher accuracy and lower false warning rate
- Monitor real-time potential alerts.
- Screen and control access of all entrances and exists.
- QR code Generated to manage all visitors
- Accurate face recognition. Identify and verify all visitors and employees to secure your business.
- NFC scanning, API Access and Easy employee management

# Gatekeeper In Action

## Example- School

Let Gatekeeper be the Intelligent  
AI Guard for your kids!

Real-time screen and manage ALL visitors  
and Access.

Monitor real-time potential alerts.  
Face recognition to secure the School,  
Daycare and Office.

# Gatekeeper In Action

## Best Choice for High Foot Traffic Locations

Our advanced AI and robotics automation technology ensures temperature and health screening done quickly, contactless, and accurately, making it an ideal choice for high foot traffic locations

**Hospitals and Clinics**

**Manufacturing and Warehouse**

**Office Buildings**

**Retail Stores & Shopping Malls**

Google Cloud  
**Partner**

# How Secure is Gatekeeper?

- Fast login and easy management platform to monitor your business.
- Our anti-hacking cloud data management system secures all data on Google Cloud and AWS.
- Or you can choose to store the data in your Private Server.

The screenshot displays the mAIrobotics Gatekeeper web interface. On the left is a dark sidebar with navigation links: User management, Visitor faces (selected), Employee faces, Department management, History records, Access permissions, and System settings. The main content area is titled 'Customer' and features a search bar with fields for Name, Phone, and a dropdown menu. Below the search bar is a table with columns: Name, Snapshot, Tenant name, Company, People number, Reason, Phone, Activation, and Start time. The table contains one entry for 'Assistant' with a snapshot icon. To the right of the table is a list of user profiles, each showing a name, ID, temperature, and a 'Process' button. The profiles listed are Jason, Sophia, Alex, Olivia, Emily, Sam, and Charlotte.

Name	Snapshot	Tenant name	Company	People number	Reason	Phone	Activation	Start time
Assistant		usdevtest	mAIrobotics	1	testing	No		2020-12-09 10:21

Name	ID	Temperature	Action
Jason	8628510300...	100.94°F	Process
Sophia	8628510300...	101.12°F	Process
Alex	8628510300...	100.4°F	Process
Olivia	8628510300...	101.12°F	Process
Emily	8628510300...	100.04°F	Process
Sam	Irvine	102.38°F	Process
Charlotte	Irvine	100.04°F	Process

## Program and Business Development Director, Tiana.

We found out about Gatekeeper in June 2020 during the COVID-19 pandemic. We had to find a solution for access control to our building, limiting virus exposure. The device is consistent, accurate, and reliable. Gatekeeper helped us to create a sense of safety and monitoring for all in the building. We loved how we can review the footage of people entering the building. It also allows us to monitor potential alerts, so we can screen and control access. The product is SPOT on and works very well, we are more than pleased with our experience. It is easy to set up and easy to use daily.

**South Bay Solutions**

## Continuous Improvement Director, Business Systems, Mike Maleski

At SouthBay we make custom Medical and Semiconductor parts. As a critical Silicon Valley company we need the best product to make sure our staff are safe, and our company stays running effectively. Covid-19 presented some significant challenges and mAlrobotics was the company that easily won our business. Making sure that every person had a passing body temperature is an absolute requirement, but it was taking way too much time and energy to make sure we had a good temp for each person, on each shift, every day.

After evaluating several products mAlrobotics was a clear winner. Not only did they have a great product that captured temps accurately and efficiently; it was such a nice experience to instantly be able to see and manipulate the records securely on Google Cloud from any browser. The interface was quick, slick, secure, modern and generally low friction like we would expect from proper UI/UX design. But what really won us over was the consistent, fast customer service that worked with all of our needs to make sure the product provided everything we wanted. mAlrobotics was an easy choice that has made our lives much better. Thank you mAlrobotics!

## Primary and Alternative Med Ctr PA, Dr. Jean Welsh, MD

We found out about Gatekeeper 3 months ago. Our practice had to find a solution to free up staff from opening the door and taking temperature. The device is great, it always redirects patients to stop and takes temperature. We were able to free up staff, and patients do not mind using the device. The main advantage of the product is that we can make sure that no one has a fever. Gatekeeper is a great product to improve patients flow and free up staff.

**Primary & Alternative  
Medical Center**

# mAIrobotics

## mAIrobotics

is based in Irvine, California. We have built an end-to-end multimodal AI robotics system, along with various humanoid and non-humanoid service robots. Together with our partners we offer solutions to make the workplace safer, healthier, cost effective and more efficient. Our innovative and unified architecture consists of a multimodal AI cloud acting as the human brain, a fast and secure networking stack acting as the human nerve system, a robot commander, and finally the robot acting as human body or Avatar. This unified architecture can serve a vast number of smart, safe, and diversified robots simultaneously. Some of our highly trusted products are multimodal AI guard, commercial cleaning robot, portable Raman spectrometer, and robot development kit (RDK). We strive for excellence and perfection for our customers.
